Special Notice that Particular Land has Research Value for Pollution Control

28th August 2024

From Equity Lawyer Mr Edward Ellis To Land Agents + Land Owners

Everyone needs to know that Particular Land has Research Value for Pollution Control. The Dictator Plan for Western Europe sacrificed Environmental Control to get Economic Growth. It used Pollution Control Denial Frauds to get Food Production Increases and Low Food Prices. It used Drug Use Permits to get New Medical Treatment that ignored the Long Term Chemical Damage. It used Sabotage Frauds against Anaerobic Decomposition of Farm Animal Waste to stop discovery what Heat Exposure for 8 Weeks did for Chemical Breakdown and to stop replacement of Environmentally Damaging Nitrogen Pellets with Environmentally Friendly Natural Nitrates. They were Governance Frauds by the State against the People and Market Frauds for Big Business against the Food Producer.

The Water Shed Case proved it. Water flowed from the shed south into the river Turn and Severn and north into the rivers Weaver and Mersey. The Northern Farm had buildings used for Intensive Pig Production and land on both sides of the shed. The Southern Farm had a Dairy Herd, a few pigs, land south of the shed and two sons in their early twenties. One was a farmer. The other was a lawyer. They decided the Intense Chronic Heat of Anaerobic Decomposition had potential to destroy Antibiotics + Chemical Drugs + Chemical Cleaners in Farm Waste. They decided that Anaerobic Decomposition had potential to replace the Environmentally Unfriendly Nitrogen Fertiliser with Environmentally Friendly Natural Nitrates. They decided that the Methane Energy Cost Saving, Nitrogen Cost Savings and Environmental Good Will would be enough to get co-operation from farmers and improve the water quality down the river systems to the Mersey in the north, the Severn in the south, and then everywhere else. Rapid uptake needed good conditions. In autumn 1973 the Yom Kippur War got a humiliating defeat for Israel against 14 Arab Nations States. In June 1974 the OPEC States vented their anger with a Massive Rise in Oil Prices. The intent was to punish the Western Economies with Price Increase Wave. The impact on farmers was Increased Prices of Nitrogen Fertiliser and Farm Fuel had a big impact on farmers. A Farm Manure Success made possible more Farm Successes. The lawyer decided it got good conditions for rapid uptake. It needed a Project Priming Experiment to discover whether the Ambient Temperature at the Water Shed was high enough. They filled an Iron Milk Churn with Pig Manure, turned it upside down and put it in a Stone Trough that was 4 feet deep, in a shaded position and full of water. The Churn Lid was 4 inches deep. The experiment was to discover whether 10 Gallons of Pig Manure had enough energy to lift the Iron Churn off the 4 Inch Lid. Experiment Gossip from the Small Farmer up to the Land Owner got a Hostile Response from the Nitrogen Producers and the Farm Equipment Manufacturers. They needed to avoid change that made their products redundant. They needed Experiment Sabotage Gossip from the Land Owner down. They needed a Farm Anaerobic Decomposition Research Permit Request from ICI to get a Research Permit from a Big Land Owner and Research Frauds that got Efficiency Findings for Nitrogen Fertiliser against Natural Nitrates. A Major Research Fraud was that Anaerobic Decomposition on an Industrial Scale needed Expensive Equipment for Rapid Processing of Fresh Manure while it was still warm. The Plan Risk was that Research Control Advice got Permit Conditions from the Land Owner that discovered the Research Frauds and got Efficiency Findings for Natural Nitrates. Queen Elizabeth and the Duke of Westminster had biggest land holdings. The Research Control Risk was high with Queen Elizabeth and low with the Duke of Westminster. A Research Permit from him got the Efficiency Findings Frauds for Nitrogen Fertiliser. The Duke of Westminster realised when it was too late that the manufacturers were making more out of his land than he was. He sold most of it, financed big ventures worldwide and soon was richer than Queen Elizabeth. The Research Frauds prevented Anaerobic Decomposition of Human Waste long enough for it to become a Massive Problem. All of it results in Particular Land having Research Value fifty years later.

The Evidence Provider knows that use of anything as evidence that is known to be false or not believed to be true incurs Perjury Liability Page 1 of 1
