Credibility Recovery Best Advice from Equity Lawyer to Media Managers 2nd September 2024

The Case Headings get Admissible Evidence Status for Case Papers in the Parliament Sessions Court

Best Advice is a Credibility Recovery Plan for Media Managers.

1. Credibility Recovery needs use of Major Events to explain the sequence Power Changes for Propagandists against Journalists and for Journalists against Propagandists. It needs Double News Coverage. It needs use of Live Events to explain the Power Change.
2. Market Conditions govern the Power Balance for Justice Managers against the Injustice Managers.
3. Defamation Remedy Powers for the Citizen forced dependency on Proof Sets for Just Reporting. Exceptions tested the rule. Remedy Monopoly Powers for the State forced dependency on Political Approval and Protection Frauds. Exceptions tested the rule. Test Cases got Dismissal Behaviour that used questions like 'what is the audience interest?' and then Refusal Decisions evidenced by No Response and then Hostile Rejection + Ruin Frauds.
4. Politicians lost control to Crime Partnerships of State Officers and Law Court Judges. It got a reduction in the number and seriousness of the exceptions that tested the rule. Politicians wanted Blackmail Powers for State Officers that got Immediate Obedience from the Citizen. It needed use of Electronic Signature Dictator Powers for Financial Asset Loss Threats. The European Leaders needed to avoid the choice of Dictator Powers for the State and Financial Security for the Voter getting a Landslide Rejection of the European Constitution. A Referenda Majority for the European Constitution needed Electronic Signature Dictator Power Concealment Frauds.
5. Advanced Electronic Signatures needed Writing Analysis Technology for User Identification and an Internet Service for Document Identification, Signature Attachment and Signed Document Verification. The Obvious Business Plan was On Line Services. The Obvious Defence Plan was Source Code Secrecy so that No Publication denied a Copyright Expiry Start Date and got Permanent Copyright. In 1998 British Citizens developed the Writing Analysis Technology. The European Leaders made a Personal Profit Plan. It needed Source Code Theft, Forced Usage in the European Union and Usage Licence Fees for the Source Code Thieves. The Theft Manager was Prime Minister Mr Blair. The Theft Agent was Barclays Bank Group Board. Bad Management got a Theft Failure and Theft Conspiracy Proof against the Bank Officers, Bank Group Board, Bank of England and Prime Minister Mr Blair. The European Leaders used Consumer Protection Frauds for Market Exclusion Frauds against Advanced Electronic Signatures. At time Market Access needed Internet Usage of the US or Universal Deliveries of Royal Mail and Post Office Post of the UK. UK Market Frauds started with Forced Account Transfers from the Post Office to the Banks. In 2003 a British Citizen developed the Internet Service for Document Management. A Market Ready Report from the Secret Service. In 2004 a Fleet Maintenance Contract of a British Citizen and BP got Business Usage for the Advanced Electronic Signature Technology, a Market Access Report from the Secret Service and Business Sabotage Frauds by the European Leaders that used Extradition Frauds against a British Manager and Imprisonment Frauds against him and a Dutch Manager. In December 2004 a Case Explanation got the 'What is the audience interest' question from a BBC World Service Journalist who was stood outside the South African Embassy in London. Market Frauds used Technology Frauds + Accounting Frauds + Career Ruin Frauds by the Post Office against Post Masters. The 2024 Scandals + Election Result are Audience Interest Proof.
6. Credibility Recovery needs Propaganda + Censorship Scandal Exposure by Media Managers
