

1. The 2023 World Peace Plan requires a Fundamental Change that gets Strategic Advantages for Equity Governance against Dictator Governance. It needs Moderate Conservative Policies that use Consumption Restraint to get surpluses that finance Poverty Reserves + Skill Reserves + Disease Reserves + War Reserves. It needs an end to Identity Proof Monopolies of the State. It needs Advanced Electronic Signature Technology. There are two components.
  - 1.1. Writing Analysis Technology for the Discrete Pattern Identification of Computer Users.
  - 1.2. A Document Management Internet Service for Document Identification + Signature Attachment + Signed Document Verification.
2. In 1998 UK Citizens got the World Lead in Writing Analysis Technology using Wacom Pads. Market Access needed High Internet Usage of the USA or Universal Deliveries of the UK Post Office and Royal Mail. Equity Lawyer Mr Edward William Ellis has 50 % Copyright + 100% Marketing Rights + 100% Creditor Control. He is a UK Citizen. He wanted the Market Lead Profits for the UK and Power Controls for the Citizen against the State.
3. The Community Identification Plan was to start with Post Office Masters, use them to identify Royal Mail Deliverers, and use them to identify Delivery Customers. The Market Access Plan was to use the Post Office to provide Trust Services at Value Prices. It needed a Personal Account for All Users that enabled the Post Office to provide a Payment Clearing Service. The Defence Plan was Source Code Secrecy. Copyright lasts for 50 years from the Publication Security. No Publication Date gets Permanent Copyright. The Security Plan used Encrypted Data and Separate Locations for Storage and Access. The Integrity Plan was to vested System Setting Powers in an Adjudication Jurisdiction that was Credibly Independent of the Equity Lawyer.
4. The Equity Lawyer expected the Market Development Profits to create the need for Inflation Control. He decided on UK National Debt Repayment and Foreign Investments targeted at Peace Management. The Key Investment was to make the Gaza Strip prosperous, increase the Commuter Traffic to Gaza and persuade the Israelis Authorities to stop the Border Controls.
5. The EU Leaders made a Personal Profit Plan. It needed Source Code Theft, Forced Usage in the EU, and Usage Licence Fees for the Source Code Thieves. UK Prime Minister Mr Blair was the Plan Manager. The UK Secret Service made Usage Licence Fees for the UK a Theft Condition. It defeated the purposes of the Private Profit Plan. The Plan Manager used Barclays Bank Group Board. They used Low Rank Officers as Theft Agents. The Theft Plan included the Forced Transfer of Customer Accounts from the Post Office to the Banks to deny Service Competitors use of the Post Office. They were Loss Making Accounts. The Banks did not want them. They made a Resistance Plan. Barclays Bank Group Board had Equity Lawyer as a customer and a Senior Manager who wanted to service his Business Plan. The Group Board made completion of the Sabotage Frauds against the Post Office a Theft Condition. The result was Technology Assessment Appointment Instructions from the Group Board got Assessment Appointments by a Technology Officer. The Resistance Plan got a series of Account Transfer Meetings for the Cabinet and Banks that got News Publicity for Success Reports from the Cabinet and Failure Reports from the Banks. The Equity Lawyer knew what was happening. He noticed that each News Publicity coincided with Appointment Cancellations + New Appointments by the Technology Officer. The process got Source Code Theft Conspiracy Proof for the Equity Lawyer and a Theft Failure for the Theft Conspirators. They managed Market Access Denial Frauds against him. The Advanced Electronic Signature Statutory Instrument 2002 pretended to be Consumer Protection. It was a Market Exclusion Fraud that vested Licence Powers in the State. All EU States copied it. There were No Licence Application Forms + No Licence Process + No Licence Staff. The Market Exclusion Frauds included Advanced Electronic Signature Tags for many thousand products that ensured Internet Searches did not return the Statutory Instrument from sometime in 2002 to 2025. In 1999, the Writing Analysis Technology got a Gold Medal at the Geneva Inventions Exhibition. It was Originality Proof. The Theft Plan continued. It used a series of Bankruptcy Frauds that failed and got Bankruptcy Fraud Conspiracy Proof against the Theft Conspirators. Market Access needed the USA Market. The Theft Conspirators used Executable Code in efforts to get Service Sales to the US Authorities, who knew about the Theft Conspiracy. The Equity Lawyer kept the Theft Conspiracy Proof + Originality Proof for USA Jurors. In 2003, a friend of the Equity Lawyer developed the Document Management Internet Service. The UK Secret Service witnessed the Internet Test Success Results.
6. The Equity Lawyer had the World Lead and knew that one day he would get Market Access. The Market Exclusion Fraud angered him. He made a Penalty Plan against the EU. The Plan Details are His Secret. He got the Endemic Corruption Proof that enabled King Charles to negotiate the World Peace Plan. It needs Advanced Electronic Signatures. On 11<sup>th</sup> April 2025, an Internet Search returned the Statutory Instrument as Item 1. Wacom Hardware was marketed with Advanced Electronic Signature Services that are not yet available. Wacom Managers need Political Permission to have Business Meetings with the Equity Lawyer. Since then, the EU States have collaborated on Western European Defences. The Greenland Tariff Proposal have offended the Equity Lawyer.
7. The Equity Lawyer considers it a UK Patriotic Duty to give the US President the choice of a Greenland Tariff Withdrawal + Normal Business Relations or Penalty Plan Target Status for the USA.
