

1. The Governance Choice is Dictator Governance or Equity Governance.
2. Dictator Governance is Power Concentration for Unrepresentative Minorities against Majorities.
3. Equity Governance is Power Distribution for the Absolute Majority against Minorities.
4. The Immediate Priority is the Governing Priority for the Unrepresentative Minority. It changes, gets a series of Conflicted Priorities and Inherent Instability for Dictator Governance.
5. Stability Management is the Governing Priority of Absolute Majorities. It gets Inherent Stability for Equity Governance. It needs Just Laws.
6. Primates had Dictator Governance by the Most Powerful Tribe Member. The Harsh Conditions of the Ice Age forced the Northern Primates to adopt the Group Survival Priority. It discovered Equity Governance and the Management Requirements.
7. Equity Governance requires use of Reliable Objectivity at every stage of the Decision Process for Truth Discovery and Just Reasoning what to do with Group Power for Group Survival.
8. The Harsh Conditions of the Ice Age created Priority Conflicts between the Group Cohesion and Group Survival. Group Cohesion needed Subjective Reasoning. Group Survival needed Objective Reasoning. It discovered a Natural Division between Herd Oriented Personalities with the Subjective Reasoning Capacity and Isolate Personalities with Objective Reasoning Capacity.
9. Ice Age Food Shortage Episodes got Compelling Support Evidence + Balanced Objective Reasoning that the 5,000 Calories Daily Requirement + No Food Gathering Capacity of Mother + Baby v 2,500 Calories Daily Requirement + Food Gathering Capacity of Mother Alone validated Baby Sacrifice.
10. Ice Age Harsh Conditions made Baby Sacrifice the Standard Response of Survivor Groups to the Stress Conditions of Disease + Famine + War. The reason is that no one had the Skill Sets needed to get Compelling Support Evidence and manage the Balanced Objective Reasoning to validate Stress Response Changes.
11. The Ice Age ended. Temperature Changes got Food Increases. It enabled Larger Groups. It got a Power Transfer for the Herd Oriented Personalities against Isolate Personalities. The Baby Sacrifice Stress Response was a Common Practice that All Small Groups brought to Bigger Groups. Group Leaders used Baby Sacrifice for Big Group Governance. Young Mothers were very often the Least Qualified to manage Invalidity Arguments against Baby Sacrifice. They needed the support of Isolate Personalities who were willing to take the Conflict Risk of making an Invalidity Case to the Group Leaders. The Isolate Personalities willing to do so were Blood Relatives with Strong Bonding and Personal Power that made the Conflict Risk an Acceptable Proportionate Risk. In most cases that depended on Group Size because Bigger Groups needed Stronger Discipline than Small Groups. A Proportionate Risk needed a Baby Saver Group that had the Enforcement Resistance Power and Viable Size for Group Survival in the event of an Expulsion Decision or Independence Decision. In practice that is likely to have been rare.
12. The Bible reveals that Baby Sacrifice was Common Practice. The Hebrews managed a Worship Change from Baby Sacrifice to Lamb Sacrifice to the War God Yahweh. The likelihood is that over a period, perhaps 100 years, the Baby Survival Rate Increase + Defection Rate Increase from Other Tribes to the Hebrews by Young Mothers for the Save Baby Motive got a Tribe Size Increase. It made a Hebrew Civil War a Bigger Risk than Inter Tribal War. It needed a Worship Change from the War God Yahweh to the Peace God Emmanuel. It needed the Common Law of Ten Commandments for Stability Management.
13. Just Process needs a Decision Management System for Rights Definition and Rights Enforcement. The Ten Commandments were a Common Rights Definition with an Enforcement Guide. It needed a Management Guide Upgrade for both Rights Definition and Rights Enforcement.
14. The Common Rights Definition created Nation Powers. History has been Nation Power Control Efforts.
15. The Hebrews vested Justice Management Responsibility in Tribe Leaders. Judge Executioners managed Standards Enforcement. It was Remedy Management for Worst National Domestic Cases but not Lesser National Domestic Cases or the International Cases. The Hebrews created the David Myth to get Safe Conditions for a Monarchy Experiment. It separated Execution Jurisdiction for the Crown and Accountability Jurisdiction for Chief Rabbi and Reliably Objective Reasoning Obligations for both. The David Myth provided Power Misuse Legends that provided Safe Conditions for the Chief Rabbi to give Risk Warnings to the King against Bad Decisions.
16. The Hebrews had two Kingdoms: Judea and Israel. In a 250-Year Period, the Coronation Powers of the Chief Rabbi got a Lawful Crown Succession for one kingdom, and the Coronation Powers Deficit of the Chief Rabbi got Coup Successions for the other kingdom. It validates use Crown Succession Law as a Civil War Risk Control.
17. A Common Law Application Limit for Hebrews against Gentiles got a Domain Limit against the Common Law.

18. The Citizen Status Qualification Decision for the Conquered Populations against the Roman City Population got Domain Increases for the Roman Empire until it made a Domain Limit Decision.
19. Roman Empire Expansion needed Religious Tolerance with the Tolerance Limit of Top God Status for the Emperor.
20. The Roman Empire Domain Increase was Support Evidence for Common Law Domain Increase Arguments.
21. Common Law Domain Increase Arguments by Jesus Christ got Argument Penalty Frauds by Perverse Vested Interests. It denied use of the Hebrews as Domain Increase Managers for the Common Law. It created the need for Gnostic Christianity as Domain Increase Managers for the Common Law.
22. The growth of the Monotheistic Religions, and Roman Emperor Top God Recognition Refusal Severe Penalty Enforcement against Gnostic Christians was an Instability Risk. It motivated a Policy Change. It replaced the Religious Freedom Limit of Top God Status for the Emperor with an Empire Stability Condition. The Hebrews misunderstood the Policy Change, asserted themselves, were classified as an Instability Risk and suffered Severe Penalties. The Monotheistic Religions continued to grow. Stability Management needed the Emperor Family to accept change. They chose Gnostic Christianity. It created Relatively Safe Conditions for Further Change.
23. The Roman British received Gnostic Christianity as a Belief Religion with an Equity Aspiration. I was a Salvation Lottery. They wanted Salvation Certainty. They developed a Case Management Upgrade for Rights Definition and Rights Enforcement to get a Salvation Certainty conditional upon Good Intent and Competent Management. They created a Common Obligation for everyone to serve as Justice Manager subject to a Proportionality Limit that depended on the Remedy Capacity of Power, Talent and Wealth. It increased the Success Rate and got a Power Transfer for Objective Reasoners against Subjective Reasoners. It was a Perversity Control against Vested Interests.
24. Roman British Common Law required Management Equality for Case Parties using: separation of Rights Definition Jurisdictions from Rights Enforcement Jurisdiction + separation of the Rights Enforcement Jurisdictions of Expert Witness, Investigators, Prosecutor, Defender, Trial Adjudicator and Appeal Adjudicator + Credible Neutrality Qualification for the Rights Enforcement Jurisdiction Offices + Absolute Priority for Validity Investigations to discover and remedy Party Equality Breaches + an Evidence Balance Start Position of a Validity Presumption for the Citizen and Credibility Presumption for the State subject to Rebuttal Proof Positive + Inadmissible Status for Process Evidence got by Party Inequality Breaches + Fraud Proof of anything getting a Proof Burden Reversal for the Fraud Victim against the fraud Manager and Fraud Beneficiary subject to Rebuttal Proof Positive + a Validation Process that identifies and invalidates anything that is a Relationship Damage Risk for God and the Absolute Majority, then an International War Risk, then a Civil War Risk, then a Local Riot Risk then a Case Party Brawl Risk. It establishes a Valid Options Sets. The Validation Process separates them into Option Sets, eliminates the Worse Option until there is an Option Set of one or more of Equal Validity and uses it or one for the Rights Declaration. Rights Enforcement repeats the process until it gets Rights Declaration for Rights Enforcement or against it for a Damage Limitation Reason.
25. The Nicaean Assembly managed by Roman Emperor Constantine for Gnostic Christians was a Governance Standards Parliament. They spent 60 years defining a Common Belief Declaration. Meanwhile, Roman Catholic Christianity evolved to service the Stability Requirements of the Military Dictatorship. It was a Moral Dictatorship and a Vested Interest against the Equity Governance.
26. The collapse of the Roman Empire created Power Vacuums most of which were filled by Military Dictators. Roman Catholic Christianity was a Moral Dictatorship that supported most of the Military Dictators.
27. The Empire Withdrawal from Roman Britain created an Executive Power Vacuum that was filled by Tribe Chiefs and an Adjudication Power Vacuum that was filled by the Gnostic Christians.
