   7.1. identify Goodwill Remedy Partners,
   7.2. discover the need for a Perverse Zealotry Management Plan,
   7.3. make Perverse Zealotry Management the 7th Agreed Remedy Priority,
   7.4. prepare for the Election Campaign

Demonstration Cases:

1. Bad Case. Roman Citizenship provided a Broad Base that supported the Emperor Dictatorship. It needed Religious Tolerance. Top God Status for the Emperor was the Tolerance Limit. Growth of the Monotheistic Religions was an existential threat. The Roman Emperors had to adapt or collapse. They needed One Official Religion that offered the Least Risk of New Conflict with the Vested Interest of Roman Citizenship. Everyone knew that worship of a Goodwill God needed Justice Management that used Reliable Objectivity for Truth Discovery and Just Reasoning to identify and remedy Vested Interest Wrongs. The choice was Zoroastrianism, Judaism and Gnostic Christianity. They chose Gnostic Christianity because it was in Rapid Expansion, the Universal Congregation posed the Least Risk of a New Conflicts with the Vested Interests of Citizenship and Emperor Status and Perverse Zealotry made them manageable. Emperor Constantine took the Official Religion Management Risk. He established the Nicaea Assembly to agree a Christianity Definition. No Zealot Control resulted development of Assembly Management as a Vested Interest, and 60 years spent on Definition Discussions before the Creed Agreement. It is likely that the Empire Collapse Crisis was the Zealot Control needed to get the Creed Agreement. Meanwhile, nothing stopped development of the Roman Catholicism that used Ordeal Trials and Battle Trials to deny Reliable Objectivity discovery of the truth and just was a Vested Interest Risk Control for the Barons and Bishops.
2. Good Case. The Roman British Gnostic Christians developed the Decision Discipline to manage the relations between the Individual and God. It used Reliable Objectivity to Truth Discovery and Just Reasoning to identify and avoid wrong and thereby discover right. Then they used it to develop the Common Law. The Saxons had an Elected Kingship. The Common Law governed the Election Process. It needed whoever might be a Civil War Threat to provide the Candidate List. The House of Wessex was the Most Powerful Party for 250 years until there were No Viable Heirs, and the House of Godwin was the Most Powerful Party. The Candidate List of sons and cousins had a Management Experience Presumption subject to Rebuttal Proof Positive. The Witan chose whoever they thought was best able to manage Governance Stability. They had a Merger Plan with Mercia using the Wessex Crown. Athelstan usurped the Mercian Crown and frustrated the Merger Plan. A Priority Decision by the Witan for the Merger Plan got the Wessex Crown for him. A Priority Decision for Equitable Due Process required a Usurpation Penalty. It was Crown Possession for Athelstan and a Succession Reversion for his Half Brother who was the Usurpation Victim, and a Saxon Chronicle Record Prohibition against Athelstan as a Usurpation Risk Control. Military Successes got a United British Isles. Athelstan murdered his Half Brother to get Succession Rights. It broke confidence in a United British Isles. A Chronicle Prohibition Breach or Prohibition Revocation got the Athelstan Records 17 years after he died. It demonstrates Du8e Process Control.

The Peace Plan:

Bankruptcy Conditions motivated the Peace Plan. Recovery Management needs Fraud Damage Indemnity Claims against Liable Parties. It has created Power Vacuums. Indemnity Claim Leaders will fill the Power Vacuum.
